

Certified Backflow Tester Registration Information

Certified backflow assembly testers and licensed irrigators should register with the city of Victoria via the Development Services department. The completed [contractor license application](#) should be submitted to the Development Services department for validation of licensing. Please include a copy of driver license and copy of said license(s).

For questions on the contractor application, please contact:

[Development Services Department](#)

700 Main Center, #122

Victoria, TX 77901

361.485.3320

In addition, the certified backflow assembly tester or licensed irrigator should submit a copy of the submitted contractor application, copy of current calibration certificate for gauges, driver license and copy of said license(s) to the Public Works Department prior to proceeding with any testing.

All completed Backflow Assembly Test Forms are required to be submitted to the Public Works department within **10 days** of testing.

For questions on backflow testing & compliance, please contact:
